

# Manufacturer Suggested Cleaning Recommendations

**CMS 3.0 and ADA compliant Personal Sound Amplifiers  
SuperEar® Models SE5000, SE7500, SE9000HP**

Caustic cleaning agents can prevent health risks, but reduce headphone life. In a hospital or long-term care environment, EPC100 can provide economical and inexpensive shields from cross-contamination for multiple headphone users by reducing the transfer of organic material to the subsequent headphone user, while still providing sound clarity.

All SuperEar® hearing amplifiers come packaged with headphones that have one pair of comfort foam ear pads to help keep individuals comfortable during extended periods of use. Replacement headphones and foam pads are available for purchase, however, should something happen while the product is under warranty, please contact us.

EPC100 are sanitary disposable headphone earpad covers for small headphones. Soft, comfortable, inert fabric allows MRI scans, and is hypoallergenic; perfect for hospital patients. Our hygienic breathable material allows clear sound quality while maintaining sanitary inter-person use.

Easy to apply and replace after each use, Ear Pad Covers can be removed and discarded, and the headphones and transmitter cleaned with a light application of an alcohol bases disinfectant before replacing. For added convenience and control, Sonic Technology disposable covers come in a box of 100 covers (50 pair) for easy storage and distribution.
